Key Vocabulary

The Industrial Revolution

The Industrial Revolution began around 1760. It led to many of the biggest changes of the Victorian

era. It introduced new machines, new industries and new jobs...even for children! There were major changes in energy, technology and engineering.

Energy

- Some industries began to use water and wind as energy sources instead of animals or humans.
- People began using coal for fuel instead of wood (this gave out more heat and produced better quality steel).

Technology

- New machines were invented that could work much faster than humans!
- The steam engine provided more energy for larger factories.
- The steam locomotive and railways made travel much quicker.

Engineering

Engineering improved through a mix of new materials and better scientific understanding.

Richard Arkwright

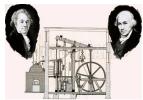

Sir Richard Arkwright became known for his work in the textile trade He built the world's first successful water-powered cotton-spinning mill at Cromford in 1771, with his business

partners Strutt and Need.

James Watt and Matthew Boulton

James Watt was an inventor, surveyor, instrument maker and engineer. He entered into partnership with Matthew Boulton and their steam engine was built in 1786 At that time, no one else could supply a steam engine that pumped water and ground barley at the same time.

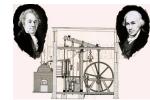

Word	Definition			
Victorian Era	The time period between approximately 1820-1914 and links to Queen Victoria's reign.			
Georgian Era	The time period between 1714 and 1830 (before the Victorian era).

Kingdom of Great Britain and

Ireland (1837-1901) and empress

of India (1876-1901). Her reign was the longest of any monarch in

British history and came to be known as the Victorian era.

The Victorian Era

The Victorian era is the time period between 1820-1914. This means it started roughly 200 years ago! Life was very different for children like you back then... but how?

Life for Victorian Children

Poor children often had to work instead of going to school. Many worked with their parents at home or in workshops, making matchboxes or sewing. Children could also earn a bit of money as chimney-sweeps. Working conditions were often dangerous and not safe for children.
